# Aman Mathur

Phone: +91 946 043 8773 — Email: mathur.aman411@gmail.com
Location: Ajmer, Rajasthan, India
LinkedIn: linkedin.com/in/aman-mathur-b62654245 — GitHub: github.com/IamAGhoul007

## Education

**S.R.M. Institute of Science and Technology** — Chennai, India
*Bachelor of Technology in Computer Science and Engineering; CGPA: 9.7/10.0* — *September 2022 to May 2026*

**Turning Point School** — Ajmer, India
*CBSE Class 12th - Science and Mathematics; Percentage: 87.8 percent* — *March 2022*

## Experience

**Software Development Engineer** — July 2026 to Present
*Prodapt* — *Hyderabad, India*

- Developing and enhancing enterprise automation solutions for telecom operations, automating repetitive user and application support workflows to improve operational efficiency
- Built and improved automation workflows to reduce the inflow of User Education tickets by **1**5%, minimizing repetitive support requests and improving first-level issue resolution
- Analyzing recurring user issues and support-ticket patterns to identify automation opportunities, streamline resolution workflows, and reduce manual intervention
- Collaborating with cross-functional teams to understand business requirements, troubleshoot production issues, and continuously improve automation reliability and scalability
- Participating in code reviews, technical discussions, and Agile ceremonies while following engineering best practices for maintainable and reliable automation solutions

**AI Intern** — February 2026 to June 2026
*Prodapt* — *Chennai, India*

- Developed AI-driven full-stack applications and intelligent automation systems using Python, FastAPI, React, PySpark, LangChain, and Apache Airflow across telecom analytics and customer support domains
- Engineered scalable ETL pipelines, real-time analytical dashboards, and machine learning models for telecom network monitoring and predictive maintenance, achieving 90 plus percent prediction accuracy and improving operational reliability
- Built autonomous agentic AI assistants with RAG, LangGraph orchestration, ChromaDB vector search, and Human-in-the-Loop workflows, reducing customer support resolution times by 60 percent

**Python Developer Intern** — May 2024 to June 2024
*Softech Pvt. Ltd.* — *Ajmer, India (On-site)*

- Contributed to core Python development across 3 internal projects, improving code quality by 30 percent through refactoring and optimization
- Collaborated with team of 5 developers using Scikit-learn and Pandas in Agile environment, delivering features 20 percent faster

## Projects

**Ecommerce Bot - AI Support Assistant** — Python, LangChain, LangGraph, Streamlit, ChromaDB, OpenAI — 2024

- Engineered autonomous customer support chatbot using LangChain 1.x and LangGraph, orchestrating complex multi-turn dialogs with SQLite-based graph checkpointing mechanism
- Implemented secure Human-in-the-Loop workflow with custom middleware for critical transactions, reducing support ticket resolution times by 60 percent
- Integrated hybrid RAG and SQL retrieval system powered by ChromaDB for semantic vector search, maintaining zero user data leaks
- Developed automated Gmail API notification services reducing customer query response delays by 80 percent — GitHub: github.com/IamAGhoul007/Ecommerce-Bot

**Telecom Network Intelligence Platform** — Python, PySpark, Apache Airflow, FastAPI, React, ML — 2024

- Engineered end-to-end full-stack data pipeline using React and FastAPI to process and visualize real-time network logs and cell tower performance KPIs
- Built scalable PySpark ETL pipeline with custom feature engineering on massive datasets, loading into SQLite Star Schema warehouse
- Orchestrated automated workflows using Apache Airflow DAGs with schema validation, achieving 99.9 percent pipeline reliability
- Integrated Random Forest model achieving 90 plus percent accuracy in classifying equipment failure risks, reducing network downtime by 20 percent — GitHub: github.com/IamAGhoul007/Prodapt-Capstone-Assignment

**Sentiment Analysis System** — Python, TensorFlow, NLTK, SpaCy, NLP — 2024

- Developed end-to-end AI system processing voice calls and text reviews with 89 percent accuracy in sentiment classification
- Created interactive dashboard analyzing 5000 plus customer reviews, generating insights that improved customer satisfaction by 15 percent — GitHub: github.com/IamAGhoul007/Sentiment-Analysis-ML-PROJECT

## Skills

**Programming Languages**: Python, C/C++, SQL, R, JavaScript, HTML/CSS, Java
**Data Science and ML**: TensorFlow, Scikit-learn, NLTK, SpaCy, Pandas, NumPy, Matplotlib, Seaborn, LangChain, LangGraph
**Tools and Technologies**: PySpark, Apache Airflow, FastAPI, React, Flask, Streamlit, Docker, Git, PostgreSQL, MongoDB, ChromaDB, Playwright
**Technical Competencies**: Machine Learning, NLP, RAG Systems, Data Pipelines, ETL, API Development, Agile Methodology

## Certifications

**Claude Certified Architect** — Anthropic (Professional, valid through October 2027)
**Claude Certified Developer** — Anthropic (Foundations, valid through October 2027)
**Oracle Cloud Infrastructure Certified Data Science Professional** — Oracle (August 2024)
**Oracle Cloud Infrastructure Certified Generative AI Professional** — Oracle (August 2024)
**Machine Learning Certificate** — Columbia+ (July 2024)
**Data Analyst Certificate** — OneRoadMap (June 2024)
**Data Analytics Job Simulation** — Deloitte Australia - Forage (May 2024)
**Data Analysis Bootcamp** — Udemy (December 2023)
